

press release

Oxley e-tag™ evaluation kit updated

The new updated Oxley e-tag™ evaluation kit is available to purchase as a result of unprecedented demand from potential users of e-logistic systems.

It is equipped with the latest USB Compatible Reader probe and contains three e-tag contact memory buttons, a windows Datalox™ asset recording software evaluation licence and a software development kit enabling integration into third party software applications.

Quick and easy to install the kit is available to end users and OEM developers and is recommend to trial in industries where engineering asset management is required such as defence, rail, shipping, utility and off-shore.

Competitively priced at £195 each the kit is available ex-stock from Oxley distributor Spartan Europe Ltd, UK. It also available through Oxley offices in the UK, USA, Australia and other distributors across the world.

Oxley e-tag is a field proven, rugged, automatic identification technology (AIT) that is being deployed by the Armed Forces for equipment asset management where identification, configuration and condition history should be immediately accessible to owners, users, maintainers and the supply chain.
